

# PRE-WINTER FIELD DAY ZOO(M) MEETING

Rev 1.1

Our final pre-Winter Field Day zoom meeting was held on Tuesday January 20, 2026.

In attendance LtoR, TtoB were:  
CT SM Douglas WA1SFH, Gary WE1M, Larry AB1JC, Rusty K4SAA, Marilyn NU7T, Steve K1RF, Jim KC1RBG, Jeff KB1LZ, Ned KA1CVv, Sam W1SMF, David KB1LTW, Jon AI1V and Alex N1AK(not shown).

**The Pre-WFD meeting began at 7:30 pm on Zoom**

It was decided to watch the Wx, as 9 degrees F is predicted for the weekend and 7-9 inches of snow is also predicted. We will have a "go/no go" decision by early Thursday night.

It was also decided if we do operate, we would pare down our effort to 2 or 3 stations and antennas that are already there.

Most left the meeting to attend a live zoom talk at WAS with NASA scientists on the James Webb telescope.

Everyone left the meeting feeling that this Winter Field Day operation was in danger of cancelation.

**The meeting ended at 8:25 pm**
